1727 KING STREET

IN THE CLAIMS:

The following is a complete listing of claims in this application.

- 1. (currently amended) An electromagnetic sound producing device comprising:
 - a case comprising an upper case and a lower case;
- <u>a circular recess formed in an upper surface of the lower</u> case;

terminals embedded in the lower case; and

a yoke, a coil, a permanent magnet, and a diaphragm provided in the case, the yoke having a circular shape and being mounted on a bottom of the circular recess of the lower case;

the permanent magnet being made of SmFeN-base isotropy plastic magnetic material; and

the coil and the permanent magnet being mounted on the yoke and the diaphragm being stacked on the permanent magnet.

- 2. (original) The device according to claim 1 wherein the permanent magnet has a cylindrical shape.
- 3. (currently amended) The device according to claim 1, wherein the yoke has a center pole and is mounted on a base of the case, the coil has a cylindrical shape and is mounted on the yoke, surrounding the center pole.

Claim 4 (canceled).
